

HD700-SERIES DRIFTER

Easy to maintain accumulators feature long-life diaphragms.

Rugged, dirt-resistant in-line shuttle valve requires little maintenance.

New variable-stroke piston is designed to maximize energy transmission, delivering optimum drill performance in a variety of rock types.

Unique dual-dampener system provides straighter holes and increased drill tool life.

Internally lubricated fronthead means no oiler to fill and no bearings to grease.

High-performance. Higher profits.

Furukawa rock drills provide the ultimate combination of performance and economy. Built tough, Furukawa drills are equipped with features that maximize efficiency to assure high-performance at a low operating cost:

- High-output compressors provide faster drilling.
- Low-emission, Tier III engine offers low fuel consumption and meets major exhaust emissions regulations in Europe and the United States.
- Heavy-duty undercarriages ensure strength and durability.
- Reliable dust control systems increase suction capacity.

From site preparation to quarry applications and down-the-hole drilling operations, Furukawa offers a complete line of drills that are durable, efficient and easy to operate. With Furukawa, you stay productive and profitable – even in the most demanding drilling situations.
